

Product Insights Hub — Prototype Documentation

Product: Insights Hub — Trade Me **Type:** Internal product management tool **Purpose:** Aggregate, analyse, and act on customer feedback to help product teams prioritise their roadmap.

Overview

Insights Hub is a single-page web application that ingests feedback from multiple data sources (Salesforce, CSAT surveys, NPS responses, Slack) and surfaces patterns, trends, and AI-generated opportunities to product teams. It bridges raw customer feedback and roadmap decisions.

Navigation consists of 7 pages accessible from the left sidebar:

#	Page	Purpose
1	Dashboard	At-a-glance health of all feedback
2	Opportunities	AI-generated, prioritised improvement items
3	Feedback Explorer	Browse and filter raw feedback records
4	AI Assistant	Chat with Claude about your feedback data
5	Opportunity Sizing	Quantify impact before committing to work
6	Sources & Settings	Manage data connections and saved views
7	Add Feedback	Manually capture ad-hoc feedback

Page 1 — Dashboard

Description

The home view. Summarises the last 30 days of feedback across all connected sources at a glance.

Key Components

Summary metrics (top row)

Metric	Value	Signal
Total feedback	2,847	↑ 14% vs last month
Open opportunities	40	↑ 6 new from B2B data
Trending themes	8	↑ 3 since yesterday
Avg sentiment	62%	↓ 4% vs last month

AI Summary box An auto-generated digest of the week's most important issues, written in plain English. Highlights emerging spikes, persistent themes, and any legal/compliance signals from B2B data.

"Top issues this week: checkout payment failures (up 40%), search relevance on mobile (persistent, 3 weeks), and seller fee confusion after recent pricing changes."

Top Trending Themes panel Ranked list of themes with a spark bar showing relative volume and a mention count. Themes flagged as Urgent or ↑ spike are highlighted. Clicking a theme navigates to the Feedback Explorer pre-filtered to that theme.

Feedback Volume — Last 7 Days A bar chart showing daily feedback volume for the past week, allowing quick visual detection of spikes.

Alerts panel Real-time threshold alerts (e.g. "Payment failure mentions up 40% in 24h"). Each alert is timestamped and clickable to explore the underlying feedback.

Feedback by Source Donut chart + legend showing the breakdown of feedback volume by source:

- Salesforce cases — 1,204 (42%)
- CSAT surveys — 847 (30%)
- NPS responses — 512 (18%)
- Slack feedback — 284 (10%)

Page 2 — Opportunities

Description

A prioritised list of product improvement opportunities. Opportunities are **auto-generated by AI** from clusters of related feedback, or can be created manually via + **New**.

Key Components

Filter toolbar Tabs to filter by status: All · Urgent · Under review · On roadmap · Backlog · Done

Opportunity cards Each card shows:

- Title (AI-generated or manually named)
- Status pill (colour-coded)
- Mention count and trend signal (e.g. "↑ 40% this week")
- Score bar indicating priority weight

Status types

Status	Meaning
Urgent	Needs immediate attention; high volume or legal risk
Under review	Being assessed by the product team
On roadmap	Committed, being planned or built
Backlog	Acknowledged, not yet prioritised
Done	Resolved

Sample opportunities in prototype

- Fix checkout payment failures — Urgent, 247 mentions
- Improve mobile search relevance — Under review, 189 mentions
- Clarify seller fee structure — Under review, 164 mentions
- "Unless sold prior" legal compliance — Urgent, Legal / REAA risk
- Watchlist Connect — sold data & reporting — Under review, 18 B2B requests

SAMPLE FEEDBACK

Salesforce case · 3 hours ago

"My payment keeps failing at checkout, I've tried 3 different cards and nothing works."

CSAT survey · Yesterday

"Tried to buy twice and it wouldn't process — ended up going elsewhere."

NPS response · 2 days ago

"Payment page seems broken on mobile. Very frustrating experience."

View related feedback

Size this opportunity

Create CanvasCreate Jira issue

Description

Clicking any opportunity card opens a slide-in detail pane from the right without leaving the list. This allows quick review without losing context.

Key Components

Header

- Title and auto-generated creation timestamp
- Clickable status pill with a dropdown to change status inline

Stats grid

Stat	Description
Mentions	Total feedback items referencing this theme
Trend	% change in mentions (week-over-week)
Sources	Number of distinct data sources contributing
Affected users	Estimated unique users impacted

Mention Trend (10 weeks) A mini bar chart showing weekly mention volume over the past 10 weeks, making it easy to see if an issue is spiking, steady, or declining.

Sources Chips showing which data sources contributed (e.g. Salesforce 142, CSAT 61, NPS 28, Slack 16).

Tags Keyword tags attached to the opportunity (e.g. payments, checkout, buyers, critical).

Sample Feedback Two to three verbatim quotes from real feedback items, each labelled with source and timestamp.

Actions

- View related feedback → — opens Feedback Explorer filtered to this opportunity
- Size this opportunity → — navigates to the Sizing page
- Create Canvas — generate a product canvas document
- Create Jira issue — push the opportunity to Jira

Description

A searchable, filterable table of all 2,847 raw feedback items. The primary workspace for deep-diving into what customers are actually saying.

Key Components

Theme Trends chart A multi-line chart at the top showing weekly mention volume for major themes (Payments, Search, Fees, Photos, Watchlist). Theme lines are toggleable by clicking the legend chips.

Filter bar

Filter	Options
Source	All sources, Salesforce, CSAT, NPS, Slack
Theme	All themes, Payments, Search, Fees, Photos
Sentiment	All sentiment, Negative, Neutral, Positive
Date range	Last 10 weeks, Last 30 days, Last 7 days
Keyword search	Free-text search across verbatims
Saved views	Load a pre-saved filter combination

Active filters appear as dismissible chips below the filter bar.

Feedback table columns

Column	Content
Feedback	Verbatim quote + case/survey ID and user type
Source	Source badge (Salesforce, CSAT, NPS, Slack)
Date	When the feedback was submitted
Sentiment	Negative / Neutral / Positive pill
Themes	Auto-tagged theme chips
Linked opportunity	Hyperlink to the associated opportunity

Pagination Previous / Next navigation with total result count.

Page 3b — Feedback Detail Drawer

Description

Clicking any feedback row opens a drawer from the right with full context about that specific feedback item.

Key Components

Header — full verbatim quote as the drawer title

Metadata grid

Field	Example
Source	Salesforce case
Case ID	#48291
Date	Today 9:14am
Sentiment	Negative
User type	Buyer
Platform	Mobile web

Verbatim — full quote displayed in a styled block with left accent border

Themes — auto-tagged chips, plus an + add tag button for manual tagging

Linked Opportunity — shows the associated opportunity with its status, mention count, and trend. Clickable to navigate directly.

AI Insight (AI Note) — an AI-generated contextual note explaining what this feedback signals in the broader dataset (e.g. pattern matching across 142 similar cases, likely root cause).

Actions

- **Copy verbatim** — copy the quote to clipboard
- **Link to opportunity** — manually link or re-link
- **Flag for review** — escalate for team review
- **View in Salesforce →** — open the source record directly

Page 4 — AI Assistant

Description

A conversational chat interface powered by the **Claude API (Anthropic)**. Team members can ask natural-language questions about the feedback corpus and get synthesised, data-grounded answers.

Key Components

API Key banner A yellow warning bar at the top prompts the user to enter their Anthropic API key to activate the assistant. The key is saved for the session only.

Suggested questions Pre-written prompt pills to help users get started quickly:

- "What are the top issues this week?"

- "What do sellers need most?"
- "Any new trends emerging?"
- "Compare buyer vs seller pain points"

Chat thread

- User messages appear right-aligned in a blue bubble
- AI responses appear left-aligned in a grey bubble with an **AI** avatar
- Responses include structured lists and bold key terms

Response actions Each AI response includes action buttons:

- **Export as PDF**
- **Copy summary**
- **Create opportunity** → — turns the AI's answer directly into an opportunity
- **View sizing** → — jumps to the Sizing page for the referenced issue

Chat input A free-text textarea at the bottom with a **Send** button. Supports multi-line input.

Typing indicator Animated dots show while the AI is generating a response.

Example conversation shown in prototype

User: What are the biggest issues buyers are facing right now? **AI:** Based on the last 30 days of feedback, here are the top buyer issues:

1. Checkout payment failures — 247 mentions, up 40% this week...
2. Search relevance on mobile — 189 mentions over 3 weeks...
3. Watchlist notifications — 97 mentions...

User: Is the payment issue getting worse or stabilising? **AI:** It's getting worse. Mentions have increased each day for the past 5 days — from 18 on Monday to 61 yesterday. The spike correlates with a deployment on Tuesday...

Page 5 — Opportunity Sizing

Description

A dedicated page to quantify the impact of an opportunity before committing resources. Helps product managers make data-backed roadmap decisions.

Key Components

Opportunity selector Dropdown to select which opportunity to size. A + Compare button allows side-by-side comparison of two opportunities.

Summary metrics (top row)

Metric	Example value	Description
Total mentions	247	All feedback items referencing this theme
Unique users	~1,200	Estimated distinct users affected
Mentions / day	8.2	Daily rate, with trend indicator
Weeks trending	1	How long the issue has been in the top themes
Priority score	88 / 100	Composite score used for roadmap prioritisation

Mention Trend — Last 10 Weeks A bar chart showing weekly volume. Weeks are greyed out when low-signal; the most recent week is highlighted in red to show a spike.

Affected Segments Horizontal bar chart breaking down which user segments are impacted:

- Buyers — 82%
- Mobile users — 65%

- New users — 41%
- Sellers — 18%

Frequency by Source Horizontal bar chart showing how many mentions came from each data source (Salesforce, CSAT, NPS, Slack).

Confidence indicator A coloured dot rating (e.g. **High — 4 sources**) showing how much confidence to place in the sizing estimate based on data breadth.

Actions

- **Create Canvas** — generate a product opportunity canvas with the sizing data pre-filled

ADD FEEDBACK

Manually capture ad-hoc feedback that hasn't come through a connected channel

Feedback *

Paste or type the customer's feedback verbatim...

Source *

— Select source —

Customer type

— Select —

Customer identifier (optional)

e.g. member ID, email, or anonymous

Date of feedback

29/03/2026

Sentiment

Negative

Neutral

Positive

Link to opportunity (optional)

— Don't link / let AI suggest —

Tags (optional — comma separated)

e.g. payments, mobile, checkout

Internal notes (not shown to customers)

Context about where this came from, who raised it, any nuance...

Save feedback

Clear form

TIPS

- Paste the verbatim quote where possible — AI analysis works best on original language
- Link to an opportunity if you know it; otherwise AI will suggest the best match
- Use tags to group related ad-hoc feedback before AI clusters it
- Internal notes help your team understand context without polluting the data

RECENTLY ADDED MANUALLY

"The listing form on iPad is totally broken — fields overlap each other."
User interview · Seller · Added by you · 1h ago

"I wish I could bulk-edit my listings without going one by one."
Sales call · Seller · Added by you · Yesterday

"Got confusing emails about a listing I never created — suspect account issue?"
Support email · Buyer · Added by Sarah K · 2 days ago

[View all feedback →](#)

Description

A manual data entry form for capturing feedback that arrives outside connected channels — e.g. from a user interview, a sales call, a support email, or a conference conversation.

Form Fields

Field	Type	Required	Notes
Feedback	Textarea	Yes	Paste the verbatim quote; AI analysis works best on original language
Source	Dropdown	Yes	Select where feedback came from
Customer type	Dropdown	No	Buyer / Seller / B2B agent / etc.
Customer identifier	Text	No	Member ID, email, or anonymous
Date of feedback	Date picker	No	Defaults to today
Sentiment	Toggle buttons	No	Negative / Neutral / Positive
Link to opportunity	Dropdown	No	Manually link, or let AI suggest the best match
Tags	Text (comma-separated)	No	Group related ad-hoc feedback before AI clusters it
Internal notes	Textarea	No	Context not shown to customers (e.g. who raised it, nuance)

Actions

- **Save feedback** — submits the entry and adds it to the feedback corpus
- **Clear form** — resets all fields

Tips panel (right sidebar)

- Paste the verbatim quote where possible — AI analysis works best on original language
- Link to an opportunity if known; otherwise AI will suggest the best match
- Use tags to group related ad-hoc feedback before AI clusters it
- Internal notes help the team understand context without polluting the data

Recently Added Manually

A right sidebar panel showing the last few manually-added entries, with source, user type, contributor, and timestamp. Includes a **View all feedback** → link.

Technical Notes

- **Framework:** Vanilla HTML/CSS/JavaScript (single-file prototype)
- **Charts:** Chart.js 4.4.1
- **Fonts:** Barlow Condensed (display headings), system sans-serif (body)
- **AI integration:** Anthropic Claude API — requires user-supplied API key entered in the AI Assistant page
- **Colour system:** Trade Me brand tokens (`--tm-blurple`, `--tm-kowhai`, `--tm-charcoal`, `--tm-pink`, `--tm-amber`)
- **Navigation:** JavaScript-driven show/hide of page sections; no page reloads
- **Detail panes/drawers:** Slide-in overlays triggered by clicking list items, using CSS transforms
